Why Choose Reef Organic?

Thoughtful Genetics

Carefully selected, from our extensive strain library, to appeal to the senses of the discerning cannabis consumer.

Organic Cultivation

Award-winning combination of aquaculture and living soil cultivation methods. FREE of synthetic fertilizers or pesticides.

Craft Indoor Batches

Dense bud structures with large and plentiful trichomes. Small batch drying and curing for high consistency, potency and moisture levels. White ash & a clean burn.

Bold Sensory

Environmentally sustainable and scientifically backed growing methods designed to enhance complex terpene and robust flavonoid profiles.

All of our products are certified organically grown and processed. Our flower undergoes an extended cold dry, is hand-finished, graded and filled and sensory tested, by humans who love cannabis, before release.

TOP GROWER
AWARD

reef
organic

Award-winning organically grown
cannabis nourished by over
one tonne of live koi fish.

Why Choose Reef Organic?

We chose to merge aquaculture and organic living soil cultivation with the cannabis consumer in mind.

We use a system of growing that produces top-quality organic flower in an environmentally sustainable way. Our system is Clean Green Certified for organic cultivation and sustainability – **using 50% less energy and up to 80% less water** than other indoor operations. This means no synthetic fertilizer run-off or petroleum reliant extraction.

Our nutrient-rich water, expelled from the live fish, enhances the characteristics of the plant. Cannabis grown using this water produces higher yields, superior bud density, terpene profiles and potency compared to plants without. The Koi fish, which live up to 25 years, will stay in our ecosystem for their entire lives. That stability allows us to monitor input levels consistently and reproduce great results.

The flavour of the dried flower is rich and the ash is white with a clean burn attributed to the manipulation of temperature and light. All of this combined elevates the experience the consumer has with our products.

Jake Ward, HEAD GROWER

Why Choose Reef Organic?

Nationally Acclaimed, Locally Available.

Jake Ward, Head Grower for Aqualitas (Reef Organic), has been awarded **Canada's Top Grower** by *Grow Opportunity* Magazine. Jake has 26 years of experience in cannabis cultivation; he started as a designated grower for medical patients, and in 2016, Jake became the first employee of Aqualitas. His dedication to sourcing the best genetics, adapting cultivation through innovative methods, and bringing quality flower to consumers is evident in every gram of Reef Organic cannabis we sell.

Reef Organic cannabis is grown indoors using a combination of aquaculture and organic living soil under energy-saving LED lights.

We are Canada's first Clean Green Certified cannabis producer. Consumers can expect superior cannabis that has undergone an extended cold dry, has been hand-finished, graded, packed and weighed to ensure visual quality, trichome preservation and weight compliance. All products are sensory tested, by humans who love cannabis, for quality under Aqualitas' research licence before released for sale.
